

Eat Out to Help Out Module

The government has given a great incentive for consumers to have 50% Off their meals up to a maximum of £10 per customer for dining in restaurants. Naturally, there are certain rules such as alcoholics drinks do not qualify and available during Monday, Tuesday, and Wednesdays for the month of August only.

This is a superb opportunity for Dine in establishments to register and attract more consumers wanting to take advantage of the 50% off government promotion.

The consumer does not have to do anything, they just turn up to the participating restaurant and enjoy.

The business also reclaims the discounted amount back from the Government so its nice and seamless allowing the business to earn more revenue during the summer month.

However, the business will need to make sure that their system can manage this unique promotion and be **compliant to reclaim back from the Government.**

So, what is the Eat out to Help Out Module?

The Module is designed specifically for our Emperium Software to be able to manage the entire promotion for the set period, so the management do not need to do any calculations.

The module will also produce a report that is compliant and enable the business to reclaim back the money discounted. So, if HMRC ask for a report, you can comfortably produce a fully compliant report.

What does the Eat out to Help Out Module look like?

First, the admin will have a function titled “discount on total amount spent”. We have made it simple that even after the Government scheme, you can use this unique promotion module for your own next promotional event.

Discount on Total Amount Spent
